

PGH - Procedure of Handling Positive Cases

Starting from 30 Jan 2023, compulsory quarantine is no longer required for students who infected coronavirus. However, for the sake of health of all residents, infected residents are strongly advised to report to our Office and stay at our designated isolation rooms or opt to stay off-campus to minimize the risk of spreading COVID-19 in the hostels.

The day of RAT tested positive is Day 0. RAT should be conducted daily until negative result is obtained for two consecutive days. Please report the results to the Office for record.

Please refer to the [Important Notes of Staying in PGH Quarantine Room from 30 Jan](#) for more details.
